# Why KerkPoint

An online schedule for the whole church: services, tasks and volunteers in one place, instead of separate spreadsheets, e-mails and group chats.

## What KerkPoint does

- Plan services per church building, including weekly recurring services, with the tasks that belong to them: sexton, organist, projection, nursery, offering and more.
- Volunteers see their own schedule, pass on in advance when they cannot serve and swap a turn themselves.
- KerkPoint suggests per task who is next and can fill open places for a period in one go.
- Reminders for a turn, and a public church page and embed codes for your own website.
- Import an existing schedule from Excel, and print a monthly overview as a PDF.

## Plans

| | Basic | Plus | Premium |
|---|---|---|---|
| Price per month (excl. VAT) | €9.99 | €17.99 | €29.99 |
| Or per year, two months free (excl. VAT) | €99.90 | €179.90 | €299.90 |
| Locations | 1 | 2 | unlimited |
| Users | 10 | 20 | unlimited |
| Services per year | 100 | 500 | unlimited |
| Reminders by e-mail too | – | yes | yes |
| Import and export | – | yes | yes |
| Calendar link (iCal) | – | – | yes |
| Reports | – | – | yes |
| API | – | – | yes |

Monthly: the first month is free, after that you pay per month and cancel whenever you like. Yearly: ten times the monthly price, online or by invoice. For every payment there is an invoice in the account with the VAT shown separately. Current prices: https://kerkpoint.nl/en/pricing

## Data and privacy

- Every church has its own, shielded environment.
- The data is stored on servers in the EU (Strato, Germany).
- The data processing agreement comes with every subscription: https://kerkpoint.nl/en/data-processing-agreement
- Sub-processors: Strato AG, Vimexx, Mollie B.V..

## Try it yourself

Try KerkPoint without signing up in your own demo church with services, tasks and volunteers: https://kerkpoint.nl/en/demo. Explanations per feature are in the help centre (in Dutch): https://kerkpoint.nl/help.
